1 Introduction

This document contains the complete suite of Software Test Procedures for the HUNagScreen Dialog Box.

2 Setup

This section details setup procedures that are required before commencing the complete test suite.

The following modules must be available in the application:

AppSettings; and,

HURegistration.

Delete the following Files and Directories :

AppData/Roaming/RVMasterLog directory. This will also delete all Subdirectories; and,

RVMasterLog.ini. If necessary, rename or save the current .ini file so it can be reloaded upon completion of the test suite if needed..
