## 1 Introduction

This document contains the complete suite of Software Test Procedures for the HUNagScreen Dialog Box.

## 2 Setup

This section details setup procedures that are required before commencing the complete test suite.

The following modules must be available in the application:

AppSetup; and,

HURegistration.

Delete the Files:

C:/Users/Hew/AppData/Roaming/KenMem directory. This will also delete all Subdirectories; and,

HUKenMem.ini. If necessary, rename or save the current .ini file so it can be reloaded upon completion of the test suite if needed..

## 3 Initial Program Launch with NO .ini file.
